EDUCATION

Kalinga Institute of Industrial Technology
Computer Science and Communication Engineering B.Tech

Bhubaneswar, Odisha
2021 - 2025

Kerala Samajam Model School
Primary Education & High School

Jameshedpur, Jharkhand
Graduated in 2021

EXPERIENCE

Accenture
Packaged Application Development Associate

Oct 2025 - Present
Full-Time

- Enabled SaltStack automation for common infrastructure activities like patching in 120 servers.
- Performed security vulnerability audit and remediation on 84 Linux servers and updated subscription repositories and installed patches.
- Resolved 16 high priority incidents and several standard, moderate incidents on linux infrastructure.
- Created Standard Operating Procedures (SOP) for various infrastructure activities and incident troubleshooting.

Accenture
Packaged Application Development Associate

Feb 2025 - June 2025
Internship

SKILLS

Programming Languages:	Java, C, Python, Javascript
Libraries/Frameworks:	Spring MVC, Spring Security, Spring JDBC, Spring Data, SpringBoot Swing library
Tools / Platforms:	Microsoft Visual Studio Code, Eclipse IDE, IntelliJ IDEA
Databases:	MySQL
Operating Systems:	Linux, Windows

CERTIFICATIONS

- Problem Solving (Basic) - **HackerRank**
- Java (Basic) - **HackerRank**
- Python (Basic) - **HackerRank**
- Neural Networks and Deep Learning - **Coursera**
- Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization - **Coursera**
- Building Scalable Java Microservices with Spring Boot and Spring Cloud - **Coursera**

PROJECTS

- Linux Remediation Engine - **GitHub**
 - Automate linux infrastructure incident/alert remediation.
- Student/Course management system in Java - **GitHub**
 - Web based application for tracking and managing Student and Courses in a University.
- Snake Game in Java - **GitHub**
 - Desktop snake game implemented using Java swing library.

SUMMARY

Motivated Software Engineer with a strong foundation in Java Full-Stack Development and Object-Oriented Programming. Proficient in building scalable applications using Spring Boot and SQL, complemented by practical knowledge of Linux Administration and scripting. Academic track record of high performance with a

focus on solving complex algorithmic challenges. Eager to leverage technical expertise in a high-growth environment to deliver robust software solutions. Having a great understanding of efficiently coordinating tasks and resources for prompt project completion. Committed to delivering high-quality work and contributing to a collaborative work environment.
